How the Mohammedan Year Corresponds With Ours.

The Mohammedan year, as a lunar year, is shorter than ours by 10 days, 21 hours and 14 2/5 seconds. This renders an exact transfer of Mohammedan dates into dates of our own calendar a very difficult task. One calculation, which is easy and almost accurate, is to deduct 3 per cent from the given Mohammedan year, and to add 622 to the sum thus obtained—e. g., our year 1892 A. D. corresponded to 1279 of the Hegira. If from this we deduct 3 per cent, or about 38, and add 622 to the result, we have the number 1862.
